

Saturday 29th August

US-guided Peripheral Venous Access [US-PVA] for Physicians and Nurses

Course Directors: M. Pittiruti (Italy), M. Lamperti (Italy)

One-day training course for physicians and nurses (6 hours overall), dedicated to the US-guided positioning of central and peripheral brachial venous lines (PICC and Midline).

Monothematic restricted-access theoretic-practical course, limited to 28 participants, organised by GAVeCeLT and WINFOCUS.

Registration fee: € 150,00 VAT included

Theory

- 9.00 a.m. Course introduction
- 9.30 a.m. US physics and technology, semeiotics and anatomy of peripheral veins.
D.G. Biasucci (Italy)
- 10.30 a.m. PVA technique suitable for the US-guided implant of cannula needles, Midline and PICC catheters: Basilic vein, brachial veins, cephalic vein.
M. Pittiruti (Italy)
- 11.30 a.m. Evidence in the literature: Cost-effectiveness of brachial accesses; advantages of US-guided positioning.
G. Scoppettuolo (Italy)
- Discussion
- 12.30 a.m. Break

Practice

- 2.00 p.m. TRAINING IN US ANATOMY AND US SEMEIOTICS OF PERIPHERAL VEINS
Teachers: **D.G. Biasucci (Italy)– M. Pittiruti (Italy)**
*US visualisation of the basilic vein, of the brachial artery and veins, of the cephalic vein on healthy models.
(small group training with separate teachers)*
- VEIN PUNCTURE TRAINING ON A SIMULATOR
Teachers: **G. Scoppettuolo (Italy) – I. Migliorini (Italy)**
*Example on a simulator of US-guided cannula needle positioning, Midline and PICC catheters
(small group training with separate teachers)*
- 6.00 p.m. End of the course

L'accreditamento è previsto per Medici Chirurghi Internisti e Rianimatori e Infermieri
